Work on page styling & content	Keegan	Yes

Before The Next Meeting

Plans:

- **Finish the product for the deadline 12/5**

Minutes from Previous Meeting

We reviewed all aspects of the project and did heavy bug testing as well as user testing in order to ensure it had an easy flow and usable features. We fixed any formatting issues that could be unpleasant to the user as well as created a settings tab that allows users to edit their profile information or change between dark mode and light mode. We also finalized the goals tab that would allow users to track progress on savings for new items or amortizations that need to be paid off. Lastly, we created more content for the landing page to attract business and show the users what the application is all about.
