Work on settings / goals	Brandon
Insert graphs / charts to display statistics in the dashboard & statistics page	Feier
Work on page styling & content	Keegan

Minutes from Previous Meeting

During the last meeting, we kept talking about our project's design. We talked about the different types of users of our product and what their needs are and how to make our product more user friendly. We immensely edited the content the pages have most noticeably the charts and graphs added into the statistics and dashboard pages this allows users to take a quick glance at their statistics without having to go down a long list of entries. We also are looking into hosting the website through heroku as well as implementing goals in the upcoming sprint in which users are able to track progress through saving and amortizations.
