- Find experts to receive feedback.

Task Assignments:

Task Description	Assigned to
Create landing page content	Keegan
Revamp UI of features pages	Feier
Implement Firestore functions for goals	Kornel
Utilize google visualization to display information as graphs	Brandon

## Minutes from Previous Meeting

During the last meeting we looked into revamping our UI in order to be more attractive to the customer. Based on our feedback we received from our MVP we saw that we had some functionality and color schemes to change in order to ensure all customers like the product. Furthermore, we are working on better marketing our product in the landing page as well as implementing more functions in order to create goals, track progress, and show trends. Lastly, we are beginning to look into google visualization API in order to show our numbers as a visual representation instead of a simple jumble of words.
