Task Description	Assigned to
Plan implementation of Gmail API	Kornel
Register taeleshotsauce@gmail.com to use as our mailing list email	Brandon
Implement user session handling	Brandon
Finish transactions/statistics page	Feier
Work on page templates and styling	Keegan

Minutes from Previous Meeting

During the previous meeting, we talked about our findings from the user studies and what we need to improve. According to the user studies, our theme color and our page layout need to be changed. We decided to get rid of the gradient in our background and also change the theme color for dark mode to make it read better. Our navigation needs to be more consistent and clear. We will need to work on the formatting of the navigation bar a bit more. We plan to work on the transactions and statistics pages more. We decided that we also need to get functions for non-monetary items working for the backend before the next meeting.
